Interpretation

The map gives a detailed view of the western part of Eisenerz, Styria, Austria. A mosaic of aerial images acquired on 05/09/2019 with a spatial resolution of 0.2 m serves as backdrop of the map. Additional geodata was used to provide information on buildings, transportation infrastructure and environmental regulations.

The map has been produced in the scope of the FP7 EU project "Driving Innovation in Crisis Management for European Resilience" (DRIVER+) and the full scale civil protection exercise IRONORE2019 that take place in parallel in the area of Eisenerz, Styria, in September 2019.

Cartographic Information

0 25 50 100 150 Meters

Local projection: UTM Zone 33N, Datum: WGS 84
Geographic projection: Lat/Lon (DMS), Datum: WGS 84
Scale: 1:1,500 for A1 prints.
